

## Parking lot USB exercise

---

<b>Contents</b>	<p>Write <b>2-3 sentences</b> about the types of information found on this device.</p> <p>Some documents have sensitive personal information that Jorge wants to keep private. These files also contain details about the hospital's operations and the personal information of others.</p>
<b>Attacker mindset</b>	<p>Write <b>2-3 sentences</b> about how this information could be used against Jorge or the hospital.</p> <p><i>The timesheets could give someone harmful information about Jorge's colleagues, which could be used to deceive him. For instance, a fake email could appear to be from a coworker or family member using this information.</i></p>
<b>Risk analysis</b>	<p>Write <b>3 or 4 sentences</b> describing technical, operational, or managerial controls that could mitigate these types of attacks:</p> <p>To minimize the risk of problems, managers can educate employees about such attacks and how to handle suspicious USB drives. Implementing regular antivirus scans is an operational measure. Another protective step is to disable AutoPlay on company computers, which stops them from running harmful code when a USB drive is inserted.</p>
